

# ROTORUA BOYS' HIGH SCHOOL

## STUDENT IPAD AP AGREEMENT 2026 11th GEN iPad

This agreement is binding between Rotorua Boys' High School (RBHS) and yourself for the purchase of an iPad and iPad case which will be paid off on or before the week of 5 October 2026.

The total cost is \$740, payable at \$20 per week, over 37 weeks. The first payment is due on Monday 26 January and the final payment is due on Monday 5 October 2026.

It is understood that these items remain the property of the school until the last payment is received.

**All repairs and other associated expenses are the responsibility of the parent/caregiver.**

Payments must be made by automatic weekly payment to:

**Rotorua Boys' High School Bank Account: 12-3155-0049929-00**

Please ensure you use the student's full name and "iPad" as the reference.

This agreement is binding on both parties and failure to meet the terms of payment will result in RBHS locking and retrieving the iPad from the student until payments are up-to-date.

If you leave Rotorua Boys' High School before full payment is received then the iPad will need to be returned to the school.

Alternatively, if you wish to keep the iPad you must pay the remaining balance immediately and allow our IT department to remove the MDM Licence - please allow up to two days for this to happen.

**Please note:** *It is important that the AP Agreement is maintained as the iPad may be locked if payments fall behind. Overdue accounts may be forwarded to a collection agency and any debt collection fees will be at your cost.*

By signing this agreement, you agree to the terms as described above. If you have any questions please do not hesitate to contact us.

Signed: \_\_\_\_\_

Caregiver Name: \_\_\_\_\_

Student Full Name: \_\_\_\_\_

Date: \_\_\_\_\_

## MDM

MDM or Mobile Device Management is a system which is embedded into all student devices. It provides a much-needed layer of management, security and application distribution enabling teachers to implement an effective digital learning programme.

Key features which the MDM provides:

1. Delivery of apps to student iPads that can help with specific areas of learning
2. Special features within the iPad such as Apple Classroom which enhances learning
3. Location and Security services . For example if the iPad is lost or misplaced we are able to lock and track it as long as it is connected to a wifi network.
4. Creates a virtual classroom which ensures the device is used appropriately

## Virtual Private Networks (VPNs)

VPNs are a tool which can be used to circumvent our school's internet policies. Please note, upon discovery of a VPN on your iPad your access to the school's network may be revoked.

## Responsibility

Having the MDM essentially manages the student device within our school and helps prevent them from accessing unauthorised sites. Ultimately, students are responsible for their devices. The device must come to school fully charged so students can engage in learning and complete set tasks. Apple has made this easier by providing Dual Apple-Id's which allows for personal use at home and educational use at school.

## Removing the MDM

Once the device is no longer required for learning purposes it is **essential it is delivered to the school for removal of the MDM**. If this is not possible please contact us to see if we can remotely remove the software (although this does not work in all cases).

## For Students who are bringing in Personal Devices with Personal Apple ID

When loading the school MDM, **your iPad will be wiped**. As a result, it's important that you back-up your data.

To back up your data to iCloud

**Settings > Your Profile (top left) > iCloud > iCloud Backup**

Make sure that this option is enabled. This will backup any photos, documents and other data you have online to iCloud.

Check through the apps listed this option to make sure that the important ones are being backed up.

Sign out of your AppleID

**Settings > Your Profile (top left) > Sign Out**

iPads are locked to AppleIDs, which makes things more complicated for us to load the MDM.

After making sure all your data is backed up, sign out of your AppleID.
